SmartReader Plus

Networking

PRODUCT	FEATURES/DESCRIPTIONS	RANGE	LENGTH/SIZE	COMPATIBILITY	MODEL	CAT. NO.
YA-200 Stereo Y-Adapter [1]	Allows SmartReader Plus to be networked using 3 wire stereo cable.	na	na	SmartReader Plus	YA-200	01-0098
YA-201 Y-Adapter for Telco Cable [2]	Allows SmartReader Plus Data Loggers to be networked using standard telephone cable.	na	na	SmartReader Plus	YA-201	01-0166
20' Stereo Extension Cable [3]	20' Extension, male – female stereo cable.	na	6 meters (20 feet)	YA-200	CB-020	31-0024
Network Power Supply (120 volt) [4]	Required when network length is greater than 50' or more than three loggers are on the network. Also works as a power supply for fast sampling with any SmartReader Plus.	na	na	SmartReader Plus	PS-201-NA	01-0165
Network Power Supply (220 volt) [4]	Required when network length is greater than 50' or more than three loggers are on the network. Also works as a power supply for fast sampling with any SmartReader Plus.	na	na	SmartReader Plus	PS-201-EU	01-0164
IC-101 Computer to Logger Interface Cable [5]	The data logger network terminates to the IC-101 Interface Cable for connection to PC or modem.	na	na	SmartReader Plus	IC-101	01-0068

Remote Communications

PRODUCT	FEATURES/DESCRIPTIONS	RANGE	LENGTH/SIZE	COMPATIBILITY	MODEL	CAT. NO.
Computer Station Modem [1]	External modem for use on the PC factory programmed for communication with ACR Data Logger Networks.	na	na	SmartReader and SmartReader Plus	USM-C	01-0300
Remote Logger Site Modem [1]	Factory programmed external modem for use on an ACR Data Logger Network.	na	na	SmartReader and SmartReader Plus	USM-R	01-0301
Modem Adaptor [2]	Required to link a single SmartReader Data Logger to a modem. Also required on any SmartReader Plus remote network. Adapts between the IC-101 and modem.	na	na	SmartReader and SmartReader Plus	MA-100	18-0023
